

FOI_0479_21/22 – FOI request concerning - Training Resources for Trauma

I am currently conducting a rapid review of existing training resources in relation to the routine enquiry into trauma that is currently available for staff within Mental Health Trusts. If your Trust provides training of this nature then please can you kindly share the training resources as needed for research purposes with the aim to improve patient experience within trauma informed care?

We are about to launch our animated e-learning trauma Informed training which will be made available freely for health and social care services. We aim to launch it next month.
