

FOI_0659_21/22 – FOI Request Concerning – National Trauma Rehabilitation

The aim of the project is to conduct a gap analysis between the supply of and demand for level 1 and level 2 rehabilitation resources and services for major trauma/critical patients with highly complex neuro-muscular-skeletal needs.

To understand the supply of level 2b resources at your centre, please would you be kind enough to answer to the following questions:

1. How many level 2b patients are admitted/referred to your centre? Please provide the yearly figures (number of patients) from the financial years ended 2019, 2020 and 2021:

- a) 2019: 78 patients
- b) 2020: 108 patients
- c) 2021: 111 patients

2. What provisions are available at your centre, in terms of beds, equipment and staff?

We have available a full range of hospital beds and are able to hire any specialist bed required from Arjo. We have a full range of hoists and stand aids available, specialist seating and wheelchairs. We have a small stock of trial powered chairs. Staff are rehab trained and we offer a full multidisciplinary team.

3. What is the average waiting time for patients to get an admission at your facility?

We do not routinely collect this information.

4. Is your rehabilitation centre accredited by the United Kingdom Rehabilitation Outcomes Collaborative (UKROC)?

Yes
